PROFILE

Computer science and information-security student who builds real software across security, data, and AI, backed by an economics minor and an interest in fintech. Built a SIEM at Fisher Brothers' AI Lab that ingests, scores, and routes alerts from 13+ security tools into a single, auditable source of truth. Drawn to systems that stay correct under pressure: clear state, honest failure handling, and actions you can trace.

TECHNICAL SKILLS

- C++
- Java/ Javascript
- Data Structures and Algorithms
- Operating Systems
- Git/ Github
- TypeScript, React, and Node/PostgreSQL
- SQL

PROFESSIONAL EXPERIENCE

AI Lab Intern (Internship), *Fisher Brothers* 06/2026 – 08/2026

- Built a SIEM in TypeScript, React, and Node/PostgreSQL that ingests, normalizes, scores, and routes alerts from 13+ security tools through a staged pipeline, replacing 13 disconnected views with a single source of truth.
- Automated the scoring and routing that analysts had done by hand, standardizing how alerts were prioritized and cutting manual triage time.
- Built accuracy and audit controls throughout: every outbound action passes through one audited gateway, missing data is flagged instead of guessed, and each step is logged for full traceability.
- Presented the finished tool to the CTO and senior staff, then shipped a revised version based on their feedback.

Mobile Sales Expert, *T-Mobile* 03/2026 – 06/2026
New York, NY

- Consistently met and exceeded individual sales and revenue targets in a fast paced, high volume retail environment.
- Processed payments and account transactions with strict accuracy and maintained clean, compliant records in line with company and financial handling procedures.
- Handled difficult customers with professionalism across in person, phone, and email channels, escalating complex cases through the correct channels for timely follow up.

Manager, *McDonald's* 10/2024 – 03/2026
New York, NY

- Created a welcoming customer experience in a high-volume environment by resolving issues quickly and maintaining friendly, accurate service.
- Coached team members on service quality, communication, and customer interaction.
- Supported customers with orders and in-store technology/POS processes during peak periods.

Bank Teller, *Wells Fargo* 01/2022 – 03/2022
New York, NY

- Built trust with customers by explaining transactions clearly and handling sensitive financial information with accuracy.
- Helped customers navigate routine banking needs while maintaining compliance and service standards.
- Identified irregular transaction activity and escalated concerns appropriately, helping prevent a $5K fraud attempt.

PROJECTS

Concurrency/ Data Protection, *OpenMp* 06/2025 – 08/2025

Built a multithreaded simulation using OpenMP and a test-and-set spinlock to prevent race conditions and protect shared data; analyzed performance tradeoffs under concurrent load.

EDUCATION

John Jay College of Criminal Justice (CUNY), *Bachelor of Science*: *Computer Science & Information Security* (*Minor*: *Economics*)
05/2027 | New York, NY

Relevant Coursework: Operating Systems, Data Structures, Linux, Process Synchronization, Systems Design

COMMUNITY LEADERSHIP/ SERVICE

Air Force Junior Reserve Officer Training Corp (AFJROTC),
Second Lieutenant - First Sergeant - Class Commander
09/2016 – 06/2020

- Served as **Class Commander** for four years, leading peers, reinforcing accountability, and helping maintain team standards
- Recognized with **MVP award** for leadership, consistency, and contribution to the program

LANGUAGES

English (Native), French (Native)

CERTIFICATES

CompTIA Network+
Expected October 2026

Google Cybersecurity
Expected August 2026

AWS Cloud Practitioner
Expected December 2026
